USDA Rural Development Recognizes Midwest Heritage Bank as a New Lender Using Agency's Guaranteed Housing Loan Program

Program Provides Attractive Rates with No Down Payment to Those Who Qualify

DES MOINES – June 2, 2009 – Jake Scott, USDA Rural Development Single Family Housing Specialist, today recognized Midwest Heritage Bank as a leading lender using Rural Development's guaranteed housing loan program.

This recognition ceremony is one of more than 15 events Rural Development is organizing in Iowa during June to celebrate National Homeownership Month. Events include such things as housing fairs, housing workshops and lender trainings.

"We are very pleased to be starting a relationship with Midwest Heritage Bank," Timothy Helmbrecht, USDA Rural Development Acting State Director in Iowa said. "Partnerships with lenders are critical to our ability to help rural Iowans achieve their homeownership dreams."

Midwest Heritage Bank, with locations in Ames, Chariton, Des Moines, Indianola, Urbandale, West Des Moines and Windsor Heights, provides a full range of financial services to its customers seven days a week.

Through the agency's guaranteed loan program a loan is administered by a local lender who takes the application, processes it and determines the acceptability of the home to be financed. Rural Development then guarantees the loan, reducing the lender's risk, and ultimately providing great benefit to the homeowner.

During the past year Rural Development has provided Iowans with \$128 million in guaranteed and direct loans to help 1,600 families living in rural communities become homeowners.

"Guaranteed lending is one of the most valuable services offered by USDA Rural Development," Helmbrecht said. "How it works is rather simple, and there are many benefits to all participants including borrowers, lenders, and even local communities."

Rural Development can also provide loans and grants directly to qualifying individuals, providing them access to affordable, safe and sanitary housing opportunities, as well as assist homeowners with removing health and safety hazards from the home and make other needed improvements.
