USDA RURAL DEVELOPMENT ANNOUNCES FUNDING FOR THE RIDERVILLE WATER SUPPLY CORPORATION

Carthage, Texas, January 6, 2004— Bryan Daniel, state director, Texas USDA Rural Development announces today that the Riderville Water Supply Corporation received a \$280,000 loan and a \$200,000 grant through the agency's Rural Utilities Service Water and Waste Disposal Loan and Grant program. The effort is part of USDA's national program to help provide rural areas with safe, dependable water and modern sewage systems.

"One of the goals of USDA Rural Development is to provide water and wastewater treatment programs that target public health benefits and provide economic opportunities to America's rural communities," said Daniel. "Rural residents can utilize our programs to help provide essential public services that will enhance their quality of life."

The funds will be used for existing plant improvements and approximately 61,120 linear feet of distribution lines ranging from 2 inch through 8 inch diameter to increase pressure and water service to 238 existing customers. Existing plant improvements will consist of adding a 40,000 gallon ground storage tank, a 3,000 gallon pressure tank, and 2-400 gallon per minute (GPM) booster pumps. The population of the area served is 600.

In Fiscal Year 2003, \$64.4 million of loan and grant assistance was infused into 71 projects and 137,451 rural Texas households. USDA Rural Development's water and wastewater program is designed to bring fresh, clean drinking water and sanitary, environmentally sound sewage facilities to rural America's 53 million residents. Loans and grants are available to rural communities with fewer than 10,000 residents. Public bodies, corporations operated on a nonprofit basis, and Indian tribes, that are unable to obtain credit from other sources at reasonable rates and terms, are eligible for assistance.
