

***Rural Development Provides Funding For
Maternity Center of the Northern Neck***

A standing room only crowd participated in the funding ceremony on December 10th at the Kilmarnock Inn for The Maternity Center of the Northern Neck.

The maternity center received over \$1.6 million dollars in assistance from Rural Development to help build the 5200 square foot facility just north of the Town of Kilmarnock.

The planned facility will contain multiple birthing suites, medical examination rooms and group parental education rooms.

The Center will provide a home-like atmosphere for the mothers and care will be provided by an innovative midwife/physician collaborative practice.

The Center is expected to be completed in late 2009.
